Got Cha Dink Club App: how a session runs

From adding a venue to giving a reward. Website: **playpass.gotchadinkclub.com**

The one idea behind everything: one OpenPlay attended = one point toward rewards. The app counts *OpenPlays attended*, not games or matches played. A player's attendance only counts after an admin approves it, and rewards are only given after the session has been marked *Complete*.

0 Logging in

- Log in at **/login/** on your phone or laptop. Your own email and your own password. Never share your password.
- The main screen is the **Organizer desk**. Its menu has: OpenPlays, Players, Attendance approvals, Reward requests, Link accounts, Audit.
- Forgot your password? On the login page tap **Forgot password** and use the link that arrives by email.

1 Add a venue (once per place)

ADMIN / ORGANIZER

1. On the Organizer desk tap **Add a venue**.
2. Look at the **Venues** list under the form first. It shows every venue we already have, with how many OpenPlays are scheduled there, so you don't add the same place twice.
3. Type the venue name and save. **Check the spelling first.** There is no rename or delete screen, so a wrong name has to be fixed by whoever manages the website. After you save, the app takes you straight to **Schedule an OpenPlay** with your venue ready to pick.

2 Schedule an OpenPlay

ADMIN / ORGANIZER

1. On the Organizer desk tap **Schedule an OpenPlay**.
2. Choose the venue.
3. Type a **Session name**, for example *Sunday Morning OpenPlay* (up to 80 characters). It is **required**: the app will not save a session without one. Players see this name.
4. Choose **Starts** and **Ends**. Times are Philippine time.
5. Save, then look at the session card to make sure the name, date and times are right.

Wrong name? Open the session and **tap its name** at the top of the page (it has a small ✎ next to it). The name turns into a text box **that keeps the current name**, so you only change the letters you need. Tap the green ✓ (or press Enter) to save, or ✕ (or Esc) to cancel. The box cannot be saved empty, because every session needs a name. Sessions made before this rule may still show "OpenPlay at" plus the venue until you give them a proper name. You can rename a session at any time, even after it is finished, and every rename is recorded in the audit log.

Wrong date, time or venue? Those cannot be edited. Open the session, **cancel it with a reason**, and schedule it again. Nothing is ever deleted. The cancelled one stays in the history.

3 Players sign up (once per player)

PLAYER

1. The player opens **/signup/** and enters their email. A link arrives by email and works for **30 minutes**. The club does **not** get a copy of this email. It goes only to the player.
2. After tapping the link they fill in: full name, contact number, **ReClub name**, **ReClub profile link**, and a password.
3. They can now register for sessions and submit attendance.

What is "Link accounts" for? It joins a person's *new login* to an *older record* the club already has for them (for example someone we wrote down before the app existed), so their past attendance is not lost.

- Only an **admin** can do it, and only for someone the club already had on record. A brand-new player never needs it.
- If a player's ReClub link is already in our records, sign-up is blocked on purpose. That is the signal to use Link accounts.
- How: **Link accounts** → type the account's exact email → compare the old and new records side by side → tick "*I verified this person's identity outside the app*" → confirm.
- **Check who they are first** (for example their ReClub profile and past sessions). Never link just because the emails look alike. There is no undo and no "merge players" button.
- An old attendance entry that was never linked **cannot be approved** until its player is linked to an account.

The player says no email arrived?

- Ask them to check **spam and Promotions**, and that they typed their address correctly.
- **Already signed up before?** The app sends no new link to an address that already has an account, and it does not say so. Tell them to use **Forgot password** on the login page.
- Otherwise ask them to wait **two minutes** and request a new link (up to five an hour). An old link stops working after 30 minutes.

4 Players register for a session

PLAYER

1. Open **Upcoming OpenPlays** and tap **Register** next to the session.
2. Changed their mind? Tap **Cancel registration**. This only works before the session starts.

5 On the day: attendance

ADMIN / ORGANIZER PLAYER

1. Open the session on your phone to see its roster (registered players). Players find the session by its **name**, date, time and venue, so a clear name helps. If a name is wrong, tap the name at the top of the session page to edit it.
2. **After the session has started**, attendance can be sent for approval in either of two ways:
   - **The player does it:** Submit attendance → pick the OpenPlay → **Submit for approval**.
   - **Staff does it for a signed-up player** from the roster. It is the same submission.
3. A submission shows as **Pending approval**. It does **not count yet**.

Players who have not signed up cannot be added on the spot. They must sign up first (step 3). The old "walk-in with no account" shortcut is switched off on purpose.

6 Approve attendance

ADMIN ONLY

1. Open **Attendance approvals**. Use the tabs: **All / Pending approval / Approved / Declined**.
2. For each submission compare the session, the roster, the player's details, and their ReClub profile.
3. Tap **Approve**, or **Decline** and type a reason. A declined player can send it again.

Never approve someone who was not there. Approving is what gives the player their point toward rewards.

7 Complete the session

ADMIN / ORGANIZER

1. **Only after the scheduled end time**, open the session and tap **Review and complete OpenPlay**.
2. Check the two numbers: **Checked in** and **Registered, unchecked**. Unchecked players are not counted as present.
3. Tap **Confirm completion**.

Don't forget this step. If a session is never completed, players' progress shows but reward eligibility stays pending. Never issue a reward by hand. Complete the session and the app does it.

8 Rewards

The app counts approved attendance at **completed** sessions and gives rewards automatically at these milestones:

OpenPlays attended	Name	What the player gets
10	Dinker	₱50 off one OpenPlay (valid 30 days)
20	Dink Addict	₱100 off one OpenPlay (valid 30 days)
30	Court Regular	FREE OpenPlay (valid 30 days)
50	Got Cha Loyalist	FREE OpenPlay (30 days) + exclusive 50-OpenPlay recognition
75	Club Veteran	FREE OpenPlay (30 days) + a small exclusive club item or perk (valid 60 days)
100	Century Club	Special recognition + a premium loyalty reward (valid 60 days)

Recognition (at 50 and 100) is a status shown on the player's page. There is nothing to hand over for it. "Valid" counts from the day the reward is earned.

How a player uses a discount or free OpenPlay

PLAYER

1. My rewards → **Use reward** → choose the upcoming OpenPlay they want to use it for → **Request this reward**.
2. Sending the request does **not** use up the reward, and they can cancel it until it is approved.
3. **Discount:** they pay the regular fee less ₱50 by GCash or cash and send proof of payment to the club as usual. **Free OpenPlay:** no payment for that session.

How you approve it

ADMIN ONLY

1. Open **Reward requests** → **Requested**.
2. The card tells you what to collect (the fee less ₱50, or nothing for a free OpenPlay). **Check the payment first** (GCash or cash).
3. Tap **Approve and redeem**. Or **Decline** with a reason, or **Release** to free the reward again.

Giving a reward directly (club item, premium reward, or at the court)

ADMIN / ORGANIZER

1. Open **Players**, find the player, check the reward is **Available**.
2. Tap **Redeem**, choose the OpenPlay if it applies, tap **Confirm redemption**.
3. Hand over the benefit yourself. **The app records the use only. It does not take payment.**

Expired rewards

ADMIN ONLY

- An expired reward cannot be used normally. An admin can **Extend expiry** (with a reason), or redeem it as a goodwill exception with a reason. Both are recorded in the audit log.

9 Corrections (admin only)

- **Wrong attendance:** open the player, tap **Correct** next to that attendance, and give a specific reason. The record is marked void but stays in the history, and an admin can restore it later.
- **Forgot someone after the session is done:** on a completed session an admin uses **Add historical attendance**, searches the player, and gives a reason.
- **A completed session was a mistake:** only an admin can cancel it (**Cancel OpenPlay**), with a reason. Attendance and rewards are recalculated, nothing is deleted.
- **Who did what?** **Audit** shows every action, newest first. It is read-only. Don't type passwords into any reason box.

10 If something goes wrong

Problem	What to do
The app won't open	Run the session on a **paper roster**. When the app is back, an admin enters each missing attendance with **Add historical attendance**. Tell the technical operator.
Player says their login is wrong	Use **Forgot password** on the login page.
Player never got the sign-up email	Check spam and Promotions. If they have signed up before, no new link is sent: use **Forgot password**. Otherwise wait two minutes and request a new link.
Wrong session created	Wrong **name**: tap the name at the top of the session page and edit it. Wrong date, time or venue: cancel it with a reason and schedule a new one.
Possible duplicate player	Don't merge anything during a live session. Ask an admin to check afterward.
Reward looks wrong	Don't change anything by hand. Look at the player's history and the Audit page first.

✓ Quick checklist for every session

1. Venue exists and the session is scheduled with the right date and times.
2. Players are signed up and registered.
3. After the start: attendance submitted.
4. Admin approves only the people who were actually there.
5. **After the scheduled end: complete the session** (Review and complete OpenPlay → Confirm completion).
6. Rewards: check *Reward requests*, confirm payment, approve.

House rules: keep your password private and unique. Players' names, numbers and ReClub links are personal data, so use them only for running sessions. Don't create fake players or fake sessions on the real site. Money (GCash and cash) is handled outside the app.
